1. The preliminary amendment including the substitute specification filed on August 17, 2001 has been entered, and claims 1 and 2 have been amended.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Dean A. Craine on January 7, 2002.

- Claim 1 (amended), line 5, replace "closed at an opposite end" with --closed end closed by welding--.

Allowable Subject Matter

3. Claims 1 and 2 are allowed.
4. The following is an examiner's statement of reasons for allowance:

4. The following is an examiner's statement of reasons for allowance:

The halogen work light disclosed by the applicant generally comprises the following features:

- A halogen lamp mounted in a housing; and a support frame supporting the halogen lamp;
- An elongated spare bulb container affixed to the exterior surface of the support frame of the halogen work light;
- The elongated spare bulb container further including a tubular body open at one end, and closed at an opposite end;
- The elongated spare bulb container further having its cavity housing a support piece and an end piece; the end piece further receiving an end of the halogen bulb; and
- The support piece positioned adjacent the closed end of the elongated spare bulb container

The above-indicated elongated spare bulb container disclosed by the applicant is known in the art. However, the prior art of record fails to show or suggest the applicant's invention as claimed. Specifically, the prior art of record does not disclose proper motivation for combining the following features:

- The elongated spare bulb container including a tubular body open at one end permanently closed at an opposite end by welding.

The combination of the above-indicated features including an elongated spare bulb container with a welded closed end and an open end makes this disclosure unique.

Leen (U.S. Patent No. 5,845,989), prior art by the applicant, discloses an integral spare bulb container for halogen work light comprising almost all the features claimed in the instant application. However, Leen ('989) does not teach the closed end permanently fixed to the tubular body of the container by welding.

Claim 2 is necessarily allowed because of their dependency on the allowed base claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
